Everything For Your Laboratory

Moisture Analyser

RADWAG Moisture analysers MA X2.A series is a modern instrument intended for high performance and quick analysis of humidity, dry mass content and many other product parameters.

The MA.X2.A series features an innovative system of drying chamber opening and closing. The drying chamber can be opened and closed using both proximity sensors or button.

Features include:-

- Measurement precision along with high performance and productivity
- Mass measurement accuracy and drying temperature optimisation
- Easy to keep clean – operator does not touch moisture analyser's housing.
- The chamber closes automatically and always with the same intensity removing any shocks caused by manual closing of the chamber.
- Drying process automation.
- Safe to operate by eliminating contact with hot components of drying chamber.
- Ease of use and maximum comfort of operation.

MA.X2.A series features user-friendly colour touchscreen. Free configuration of the control panel can be done by means of hotkeys, customisable information fields and programmable labels. Drying process can be carried out for any temperature and – thanks to databases – particular drying process may be set for a specific product.

Automatic drying chamber's lid opening and closing

Dynamic control of sample mass – maximum capacity bar graph

5" touch screen with customized buttons layout

MA50/1.X2.A Moisture Analyser, 50g x 0.1mg x 0.0001% moisture
