

SI60 & SI60D Incubators

Cole-Parmer® Stuart™ SI60 & SI60D Incubators are suitable for multiple applications such as plant propagation, humidity testing, climactic condition simulation, corrosion testing and more. Forced air circulation and electronic control ensures accurate temperature conditions. A pre-set push switch automatically sets the temperature at 37°C, while a safety feature cuts off heating if the unit reaches 72°C or higher.

- Incubation of complete instruments
- Choice of analogue or digital temperature control
- Easy access to working chamber
- Full visibility of samples
- Suitable for multiple applications

Cole-Parmer® Stuart™ SCF4 Microcentrifuge

- Personal size for quick spin downs
- Safely spin samples with dual locking lid
- Quickly change rotors with quick-release adapter
- Built-in recessed rotor bowl
- BioCote antimicrobial protection

The Cole-Parmer™ Stuart SCF4 microcentrifuge provides high speed centrifugation with enhanced safety features. The high speed 8500 rpm and 3884 RCF rating allows users to spin samples rapidly or be used in applications where greater g-force is required.

For decades, Stuart has meant quality and reliability in laboratories around the world. You can always count on Stuart to get the task done. With a wide array of benchtop equipment, Stuart can take on just about any task you ask. From stirring to melting point determination, water stills and hotplates, Stuart has your back.
