HANNA® instruments

Automatic Titrator

Don't miss out on this opportunity for current titration users to upgrade an older unit, or for those who would like to move away from manual titration methods and save money at the same time!

The HI-931 includes:-

- Method program
- Hanna laboratory verification of method on your sample
- Free installation by Hanna qualified technician
- Free on site training on delivery
- Peace of mind with 2 year warranty

Applies to orders received by 30th June 2025 only

Was £6084.50

NOW ONLY £4995.00

The HI-931 Automatic Potentiometric Titrator features a space-saving design and versatile functionality, with the ability to perform a wide variety of potentiometric titrations and pH, mV and ISE measurements when using the relevant electrodes with high accuracy and flexibility.

A 40,000-step piston-driven pump offers an unmatched degree of accuracy by enabling extremely small titrant and reagent dosing volumes throughout the titration process. This automatic titration system provides high-speed analysis with exceptional accuracy for research-grade results.
